Tertio panel collection in damp rooms

Dear Sir or Madam,

We are pleased to confirm that our Tertio paneling collections are suitable for damp rooms (e.g. bathrooms).

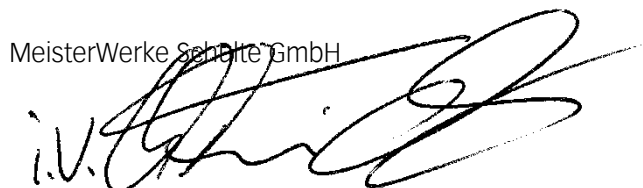

Please note that Meister decorative panels are only suitable for use in interior rooms. Even the damp room panels should not be subject to direct spraying with water as e.g. in shower cubicles. The products are not suitable for sauna rooms.

For the detailed installation conditions and instructions, preparatory measures and cleaning guide please refer to the latest installation instructions of MEISTER (instruction inserts in boxes).

We hope that this information is helpful.

With best regards,

MeisterWerke Schulte GmbH

Christian Fischer
Head of Export Administration
